ApplicInt

INNOVATION THAT LEADS

Disability Insurance

- Decrease Cycle Time
- Increase Sales
- Reduce Internal (IT) Expense
- Increase Sales Loyalty
- Ease of Doing Business

Decrease Cycle Time and Cost:

Better, more comprehensive information is collected sooner from the proposed insured, or agent, or call center (for those that need extra help) – 80% in 48 hours or less. Rx history mitigated in real time. Comprehensive Part 1 and Part 2 data mapped to state filed PDFs is available sooner for the underwriter (no need to map data at the home office). Integrated APS/EHR ordering immediately.

Increase Sales:

The longer an application takes to close, the less likely it is to be placed. That is just the way it is. ApplicInt can help. ApplicInt is an accelerated application and fulfillment process, and real time status updates to the insured, agent and home office.

Reduce Internal (IT) Effort/Expenses:

ApplicInt's all-inclusive applications collect or order all information needed for a fully underwritten policy without home office involvement, including status and communication tools. ApplicInt tools and processes fully integrate with the home office applications you already have – and ApplicInt tools are future proof. ApplicInt's software is constantly assessed to ensure that the code operates at the highest security level possible.

Increase Sales Loyalty:

When agents know that you have the best processes, the fastest issue, and superior communication, they are more likely to do business with you – again and again. How could they not when you can issue faster and support them better.

Ease of Doing Business:

Better tools, better processes, faster issue, better communications make you the better choice for Disability Insurance. DI Insurance takes a lot of work. Reducing the effort of putting business on the books, earns you business and loyalty.
